# STUDIO-S Adjustable Pedestal System

Premium Raised Support System for 20MM Porcelain, Concrete Pavers & Deck Tiles

The Studio-S Adjustable Pedestal System is engineered for rooftop terraces, balconies, podium decks, and commercial outdoor flooring. Designed for strength, precision, and Canadian weather durability, this modular system ensures perfect leveling, superior drainage, and long-term structural reliability. ✓ Precision height adjustment with threaded column

- ✓ Heavy-duty polypropylene construction
- ✓ 800–1000 kg load capacity per pedestal
- ✓ Integrated slope correction (0–5%)
- ✓ Compatible with 20mm porcelain pavers
- ✓ Freeze–thaw resistant (-40°C to +80°C)
- ✓ Fast installation – No adhesives required

## Applications:

- Rooftop Terraces
- Balcony Decks
- Podium & Plaza Installations
- Pool Surrounds
- Commercial & Residential Projects

Installation Notes: Ensure substructure waterproofing integrity before placement. Pedestals should be spaced according to tile size and load requirements. Always follow local building codes and engineering guidelines.
