

EXPLORE

Interlocking Sports Tiles

Interlocking sports tiles are modular flooring solutions designed for various athletic applications. They are commonly used in indoor and outdoor courts for basketball, tennis, volleyball, and multi-sport facilities. These tiles are made from durable materials like polypropylene or rubber and feature a snap-together design for easy installation and maintenance.

Key Features:

- Easy Installation: No adhesive required; tiles snap together.
- Durability: Resistant to weather, UV rays, and heavy impact.
- Shock Absorption: Provides cushioning to reduce injuries.
- Water Drainage: Perforated designs allow water to flow through, preventing puddles.
- Customizable: Available in various colors and surface textures.
- Low Maintenance: Easy to clean and replace individual tiles if damaged.

Common Applications:

- Basketball Courts
- Tennis Courts
- Pickleball Courts
- Volleyball Courts
- Roller Hockey Rinks
- Home Gyms & Playgrounds
